HOW TO SET THE COMBINATION

Your new resettable combination padlock is preset at 0-0-0-0. (Even though dials may appear in other numbers.)

To reset the combination:

- Step 1** Leave the dials at preset combination 0-0-0-0 and pull out the shackle.
- Step 2** Turn the shackle counterclockwise to 90° and press down all the way.
- Step 3** Keep holding the shackle and set the dials to your own desired combination. (Do not let go of the shackle while setting the dials.)
- Step 4** Release the shackle and return to its original position. Your lock is now ready to open at your own personal combination.

Keep your combination in a safe and accessible place for future reference.
