

Care and protection of leather motorcycle clothing

With regular proper care, your motorcycle clothing will last a long time and won't let you down. Many of you experienced bikers will have come to love your old worn-in motorcycle clothing for its individuality and wouldn't dream of trading it in for just any new article!

- Please waterproof your new item of leather clothing before wearing it for the first time. This is the only way to prevent moisture stains and to increase dirt-repellency.
- After use, hang up the item of clothing to air. To dry wet leather clothing, always hang it up or lay it flat at room temperature. Do not place it on a radiator and do not expose it to strong sunlight.
- Clean soiled smooth leather with a cloth or sponge. Only use clear water or S100 Leather Cleaning. **Do not use harsh solvents like petrol, cellulose thinner or turpentine!**
- Rub the leather dry with a towel. Then waterproof your article of clothing with a special leather grease or oil. We recommend that you also apply a moisture protection spray.
- Rawhide leathers are not greased and only rarely are they wet cleaned. Dirt should be dry-brushed out; a special brush can be used to raise the nap on shiny spots.
- In the case of nubuck and suede clothing, at first avoid light-coloured sofas, textiles and the like, as the sanding fibres will only be shed with wear. Heavily soiled leather clothing should always be cleaned by professional leather cleaners.

Please always follow the instructions on the sewn-in care label!

If you have any questions about the product or these instructions, please contact our Technical Centre before installation or first use by fax on 00 49 (0)40 734 193-58, or by e-mail at technikcenter@louis.de. We will be pleased to provide prompt assistance. This is the best way to ensure that your product is installed properly and used correctly.
